

Electronic Monitoring Report Released January 2023

This report is submitted as mandated by <u>Iowa Code</u>. "Per code, the department of corrections shall submit a report on electronic monitoring to the general assembly by January 15, 2023. The report shall specifically address the number of persons being electronically monitored and break down the number of persons being electronically monitored by offense committed. The report shall also include a comparison of any data from the prior fiscal year with the current fiscal year."

Overview

Effective FY2006, the Iowa Code mandated a minimum of five years of electronic monitoring for persons under community supervision who had committed certain offenses against a minor, including sexually violent offenses. As a result of this law, the number of community corrections offenders on electronic monitoring systems (EMS) more than doubled during FY2006, from 196 to 481 offenders. Between FY2006 and FY2022 the EMS population grew by another 730 offenders. At fiscal yearend 2022, 1,211 offenders are on some form of electronic monitoring in the community.

Community Corrections Offenders on EMS: FY2004-2022

Source: ICON; JDW

Sex Offenders on EMS in Community Corrections

In FY2004, about 22% of offenders on EMS were sex offenders. In FY2022, 19% of offenders on EMS are sex offenders based on most serious offense or status as a release from sex offender civil commitment to Iowa Department of Corrections supervision; still others

are required to register as sex offenders based on requirements in Iowa Code Chapter 692A. In 2009 the law mandating electronic monitoring for certain offenders whose offenses involved minors was changed to permit discretion to the district departments of correctional services, to base these decisions on validated sex offender risk assessments and other factors. However, EMS populations will continue to grow due to passage of legislation in 2005 establishing special sentences for sex offenders to commence upon completion of the original sentence (per Iowa Code §903B.1 and §903B.2); special sentences are for ten years or life, depending on the level of the sex offense. The Iowa Division of Criminal and Juvenile Justice Planning (CJJP) and Iowa Department of Corrections have projected a substantial increase in the numbers of sex offenders on community supervision in the coming years due to special sentence provisions.

Beginning in FY2010 the Iowa Department of Corrections began an electronic monitoring program for prison inmates convicted of serious offenses who the Iowa Board of Parole indicated should begin preparing for reentry. The offenders are minimum custody inmates, and are required to be on GPS monitoring while working outside the secure perimeter of the institutions. As of fiscal yearend 2022, a total of five inmates were on GPS (three at North Central Correctional Facility in Rockwell City, two at Mt Pleasant Correctional Facility in Mt Pleasant) and are included in the counts for the remainder of this report.

Types of Electronic Monitoring Systems

Several types of EMS are currently in use:

Radio Frequency. A monitoring receiver unit in the home is attached to the offender's phone and plugged into the phone jack as well as an electrical outlet. The offender wears a waterproof transmitter on the ankle that detects and alerts for tampering (for example, if the strap is opened or cut, or if the transmitter is not against the skin). This unit monitors the offender's arrivals and departures and is useful in assessing curfew compliance.

Global Positioning Satellite (GPS). The offender wears a waterproof transmitter on the ankle that detects and alerts for tampering. Additionally, this system reports: a) time and date of arrival and departure from home; b) the travel path and times while out of the home; c) any removal or tampering of the transmitter or monitoring unit; and d) any violations of exclusion zone criteria (designated area(s) the offender is restricted from entering, such as a victim's home.

SCRAM (Remote Breath). The offender has a device that is portable, handheld, and wireless with automated facial recognition and GPS location with every test taken by the offender. This system is used primarily to assess compliance with alcohol consumption restrictions and can be scheduled to send as few or as many tests to the offender as needed per day.

In addition to the growth in the numbers of offenders on EMS, there has been a shift to higher tech global positioning system (GPS) equipment. There was no GPS in use in 2004; offenders began to be placed on GPS in late 2005 and by the end of that year only about 1% of offenders on EMS were on GPS. As of fiscal yearend 2022, approximately 91% of offenders on EMS are on GPS.

Offenders on EMS by Type of System

Offenders on EMS by Offense FY22:

Offense Type	Most Serious Convicting Offense Description	Total
Violent	Assault	1
Violent	ASSAULT CAUSING INJURYPEACE OFFICERS/OTHERS	1
